Exam Style Questions

Surface Area of a Cone

Corbettmaths

Equipment needed: Pen and Calculator

Guidance

1. Read each question carefully before you begin answering it.
2. Check your answers seem right.
3. Always show your workings

Answers and Video Solutions

1. A cone has base radius 3cm, perpendicular height 4cm and slant height 5cm.

Work out the surface area of the cone.

$$\begin{aligned} SA &= \pi r^2 + \pi r l \\ &= (\pi \times 3^2) + (\pi \times 3 \times 5) \\ &= 75.39822\dots \\ &\text{or } 24\pi \end{aligned}$$

$$\begin{aligned} &\dots\dots\dots 75.398 \text{ cm}^2 \\ &\text{(3)} \end{aligned}$$

2. A cone has base radius 4cm and slant height 7cm.

Work out the surface area of the cone.

$$\begin{aligned} SA &= \pi r^2 + \pi r l \\ &= (\pi \times 4^2) + (\pi \times 4 \times 7) \\ &= 138.2300768 \end{aligned}$$

$$\begin{aligned} &\dots\dots\dots 138.23 \text{ cm}^2 \\ &\text{(3)} \end{aligned}$$

$$\text{or } 44\pi$$

3. A cone has base radius 21cm, perpendicular height 28cm and slant height 35cm.

Work out the surface area of the cone.

$$\begin{aligned}
 SA &= \pi r^2 + \pi r l \\
 &= (\pi \times 21^2) + (\pi \times 21 \times 35) \\
 &= 3694.512961 \\
 &\text{or } 1176\pi
 \end{aligned}$$

$$\begin{aligned}
 &3694.5 \text{ cm}^2 \\
 &\text{.....} \\
 &\text{(3)}
 \end{aligned}$$

4. A cone has base diameter 12cm, perpendicular height 8cm and slant height 10cm.

Work out the surface area of the cone.

$$\begin{aligned}
 SA &= \pi r^2 + \pi r l \\
 &= (\pi \times 6^2) + (\pi \times 6 \times 10) \\
 &= 301.5928947 \\
 &\text{or } 96\pi
 \end{aligned}$$

$$\begin{aligned}
 &301.593 \text{ cm}^2 \\
 &\text{.....} \\
 &\text{(3)}
 \end{aligned}$$

5. A cone has base radius 10cm and slant height 18cm.

Work out the surface area of the cone.
Give your answer in terms of π

$$\begin{aligned}
 SA &= \pi r^2 + \pi r l \\
 &= (\pi \times 10^2) + (\pi \times 10 \times 18) \\
 &= 100\pi + 180\pi \\
 &= 280\pi
 \end{aligned}$$

$$\begin{aligned}
 & \dots\dots\dots 280\pi \text{ cm}^2 \\
 & \text{(3)}
 \end{aligned}$$

6. A cone has base radius 5cm, perpendicular height 12cm and slant height 13cm.

Work out the surface area of the cone.
Give your answer in terms of π

$$\begin{aligned}
 SA &= \pi r^2 + \pi r l \\
 &= (\pi \times 5^2) + (\pi \times 5 \times 13) \\
 &= 282.7433388
 \end{aligned}$$

$$\begin{aligned}
 & \dots\dots\dots 90\pi \text{ cm}^2 \\
 & \text{(3)}
 \end{aligned}$$

$$\text{or } = 90\pi$$

7. The diagram shows a cone.
 The vertical height is 20cm.
 The radius of the base is 4.5cm.
 The slant height is y

- (a) Work out the value of y .

$$a^2 + b^2 = c^2$$

$$4.5^2 + 20^2 = y^2$$

$$y^2 = 420.25$$

$$y = 20.5$$

$$\dots\dots\dots 20.5 \text{ cm}$$

(3)

- (b) Work out the surface area of the cone.
 Give your answer to one decimal place.

$$SA = \pi r^2 + \pi r l$$

$$= (\pi \times 4.5^2) + (\pi \times 4.5 \times 20.5)$$

$$= 353.42917\dots$$

$$\dots\dots\dots 353.4 \text{ cm}^2$$

(3)

8.

A cone has base diameter 10cm.
The height of the cone is 18cm.

Calculate the surface area of the cone.

$$\begin{aligned}x^2 &= 5^2 + 18^2 \\ &= 349 \\ x &= \sqrt{349}\end{aligned}$$

$$\begin{aligned}SA &= \pi r^2 + \pi r l \\ &= (\pi \times 5^2) + (\pi \times 5 \times \sqrt{349}) \\ &= 371.99 \text{ cm}^2 \text{ to 2dp}\end{aligned}$$

$$\begin{array}{r}371.99 \\ \dots\dots\dots \text{cm}^2 \\ (4)\end{array}$$

9.

A cone has base of radius 2cm.
The perpendicular height of the cone is 5cm.

$$\begin{aligned}x^2 &= 2^2 + 5^2 \\ x^2 &= 29 \\ x &= \sqrt{29}\end{aligned}$$

Calculate the surface area of the cone.

$$\begin{aligned}SA &= \pi r^2 + \pi r l \\ &= (\pi \times 2^2) + (\pi \times 2 \times \sqrt{29}) \\ &= 46.40235\dots\end{aligned}$$

$$\begin{array}{r}46.4 \\ \dots\dots\dots \text{cm}^2 \\ (4)\end{array}$$

10. Jonathan made a solid wooden model by joining a cylinder and a cone.

Find the total surface area of the wooden model.

$$\text{Base} : \pi \times 8^2 = 64\pi \quad (\text{or } 201.0619\dots)$$

$$\text{Curved face of cylinder} : \pi \times 16 \times 14 = 224\pi \quad (\text{or } 703.716\dots)$$

$$\text{top} : \pi \times 8 \times 10 = 80\pi \quad (251.327\dots)$$

$$\text{total SA} = 368\pi$$

$$= 1156.106097\dots$$

$$\underline{\underline{1156.1}} \text{ cm}^2$$

(4)

11. Shown below is a cone.
The base has a radius of 4 cm.
The slant height is y cm.

The total surface area of the cone is 48π cm²

Calculate y .

$$SA = \pi r^2 + \pi r l$$

$$48\pi = (\pi \times 4^2) + (\pi \times 4 \times y)$$

$$48\pi = 16\pi + 4\pi y$$

$$32\pi = 4\pi y$$

$$4y = 32$$

$$y = 8$$

8
.....cm
(3)

12. Two cones, each with a base radius of 4cm, are joined together to make the solid shape below.

$AP : BP = 5 : 3$ where

AP is the perpendicular height of the larger cone.
BP is the perpendicular height of the smaller cone.

Given $AB = 12\text{cm}$

Find the total surface area of the shape.

$5+3 = 8$

$12 \div 8 = 1.5$

$AP : 1.5 \times 5 = 7.5\text{ cm}$

$BP : 1.5 \times 3 = 4.5\text{ cm}$

Using Pythagoras, the slant height of the larger cone is 8.5cm

Using Pythagoras, the slant height of the smaller cone is 6.020797289...cm

$\pi \times 4 \times 8.5 + \pi \times 4 \times 6.020797...$

$= 182.4737... \text{ cm}^2$

$= 182.4737$

$= 182.4737$

182.4737

...cm²

(5)

13. Shown below is a cone.
 The base has a radius of x cm.
 The slant height is 10 cm.

The total surface area of the cone is 39π cm²

- (a) Show $x^2 + 10x - 39 = 0$

$$SA = \pi r^2 + \pi r l$$

$$39\pi = \pi x^2 + \pi x \times 10$$

$$39/\pi = x^2 + 10x$$

$$39 = x^2 + 10x$$

$$0 = x^2 + 10x - 39$$

(3)

- (b) Hence, find the length of the radius.

$$(x + 13)(x - 3) = 0$$

$$x = -13 \quad x = 3$$

$$x \quad \checkmark$$

3

.....cm
(2)

14. A cone and cylinder are joined to make a solid shape.

Show the total surface area of the solid shape is $2\pi r(4r - 1)$

$$\text{Base} : \pi r^2$$

$$\begin{aligned} \text{Curved face of cylinder} &: \pi \times 2r \times (2r - 1) \\ &= 2\pi r(2r - 1) \\ &= 4\pi r^2 - 2\pi r \end{aligned}$$

$$\begin{aligned} \text{top} &: \pi \times r \times 3r \\ &= 3\pi r^2 \end{aligned}$$

$$\begin{aligned} \text{total} &: \pi r^2 + 3\pi r^2 + (4\pi r^2 - 2\pi r) \\ &: 8\pi r^2 - 2\pi r \end{aligned}$$

$$2\pi r(4r - 1)$$

QED
