Mathematics B
Paper 1

Thursday 26 May 2016 – Morning
Time: 1 hour 30 minutes

Paper Reference
4MB0/01

Total Marks

You must have: Ruler graduated in centimetres and millimetres, protractor, compasses, pen, HB pencil, eraser, calculator. Tracing paper may be used.

Instructions

- Use **black** ink or ball-point pen.
- **Fill in the boxes** at the top of this page with your name, centre number and candidate number.
- Answer **all** questions.
- Answer the questions in the spaces provided
  – *there may be more space than you need*.
- **Calculators may be used.**

Information

- The total mark for this paper is 100.
- The marks for **each** question are shown in brackets
  – *use this as a guide as to how much time to spend on each question.*

Advice

- Read each question carefully before you start to answer it.
- Check your answers if you have time at the end.
- Without sufficient working, correct answers may be awarded no marks.

PEARSON

Answer ALL TWENTY EIGHT questions.

Write your answers in the spaces provided.

You must write down all the stages in your working.

1 Calculate the gradient of the line joining the points with coordinates (–3, –4) and (6, –1).

....

(Total for Question 1 is 2 marks)

2 Factorise completely $18x^2 – 2y^2$

....

(Total for Question 2 is 2 marks)

3 In 1964 the high jump world record for women was 1.91 metres.
In 1987 it was 2.09 metres.

Calculate, to 3 significant figures, the percentage increase in this world record between 1964 and 1987.

....%

(Total for Question 3 is 2 marks)

4 Simplify $\dfrac{36a^2b^5}{4a^3b^2}$

....

(Total for Question 4 is 2 marks)

5 The bearing of Nashik from Surat is 142°

Find the bearing of Surat from Nashik.

.... °

(Total for Question 5 is 2 marks)

6 Given that f(x) = 3 − 2x

find ff(x) in terms of x. Simplify your answer.

ff(x) = ...

(Total for Question 6 is 2 marks)

7 $\mathscr{E} = \{a, b, c, d, e, f, g, h, i, j\}$

   $A = \{a, b, c, d, e\}$

   $B = \{a, c, e, g, i\}$

   Find $(A \cup B)'$

...

(Total for Question 7 is 2 marks)

8

A   23 cm   *B*

Diagram **NOT** accurately drawn

h cm

D   59 cm   *C*

ABCD is a trapezium with *AB* parallel to *DC*.

AB = 23 cm, *DC* = 59 cm and the area of *ABCD* is 574 cm^2

Given that *h* cm is the height of the trapezium, find the value of *h*.

h = ...

(Total for Question 8 is 2 marks)

9   Write $\dfrac{3}{x} - \dfrac{5}{2x}$ as a single fraction. Simplify your answer.

....

(Total for Question 9 is 2 marks)

10 $p^2 = 3x - 1$

Simplify $2p^2 - 6x + 7$

....

(Total for Question 10 is 2 marks)

11 The mass M_e of the Earth is 5.9722×10^{24} kg
The mass M_j of the planet Jupiter is 1.8981×10^{27} kg

(a) Find the value of $\dfrac{M_j}{M_e}$ to the nearest integer.

....

(1)

(b) Express your answer to part (a) in standard form.

....

(2)

(Total for Question 11 is 3 marks)

12 Solve the equation $\quad 2(3x - 4) - 4(1 - 3x) = 3(x + 4)$
Show clear algebraic working.

$x = $ ....

(Total for Question 12 is 3 marks)

13 Given that $x:y = 5:8$ and that $y:z = 6:7$, find $x:z$

Give your answer in its simplest form.

$x:z =$ ....
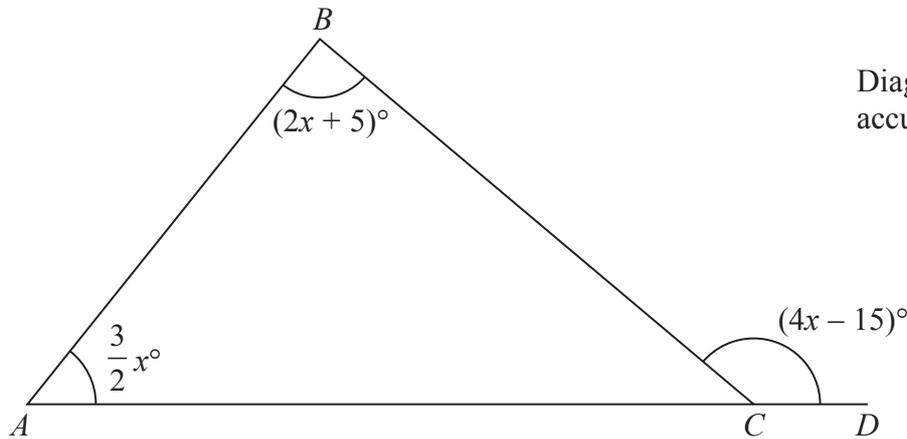

(Total for Question 13 is 3 marks)

14

Diagram **NOT** accurately drawn

ABC is a triangle and ACD is a straight line.

$\angle BAC = \dfrac{3}{2}x°$, $\angle ABC = (2x + 5)°$ and $\angle BCD = (4x - 15)°$

Find the value of x.

$x =$ ....

(Total for Question 14 is 3 marks)

15 Two non-zero vectors **a** and **b** are not parallel.

Given that $n\mathbf{a} + m\mathbf{b} = \mathbf{b} + 2m(\mathbf{a} - \mathbf{b})$, where m and n are scalars, find the value of m and the value of n.

$m = $ ....

$n = $ ....

(Total for Question 15 is 3 marks)

16 Find the largest integer, x, such that $\dfrac{1}{2}(2x + 1) > 3x - 5$

....

(Total for Question 16 is 3 marks)

17 Given that $\sqrt{(x^2 + 9)} = x + y$

find x in terms of y

$x =$ ....

(Total for Question 17 is 4 marks)

18 Here are 8 numbers

| 5.9 | 6.3 | 6.7 | 6.9 | 7.5 | 8.1 | 8.1 | 8.9 |

(a) Find the median of the 8 numbers.

....
(2)

(b) Calculate the mean of the 8 numbers.

....
(2)

(Total for Question 18 is 4 marks)

19
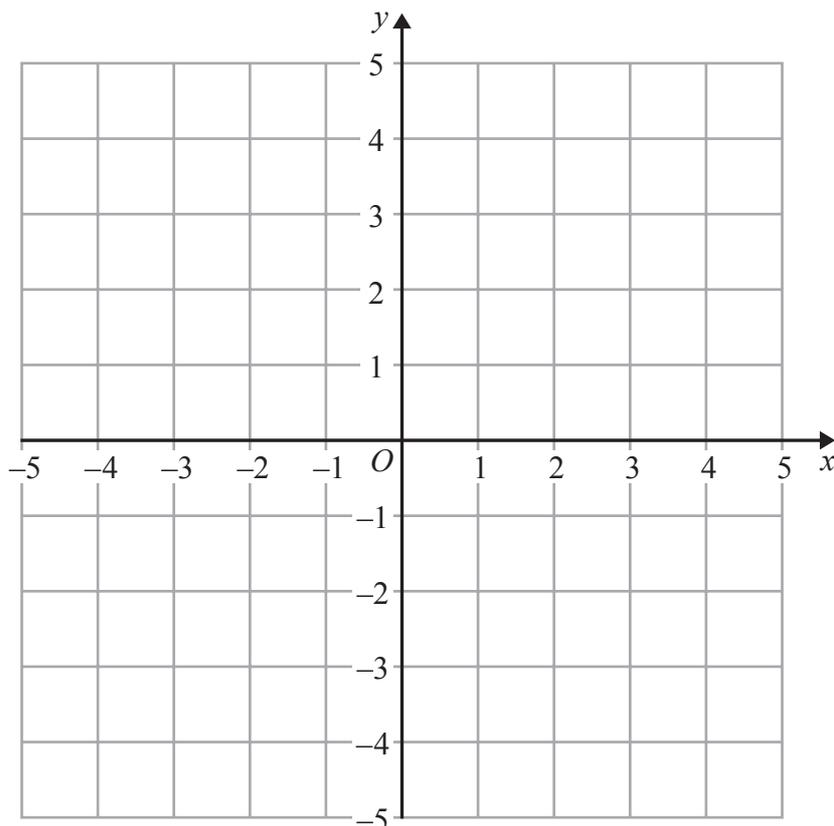

(a) On the grid, draw and label

  (i) the line with equation $y = -x$

  (ii) the line with equation $y = x + 2$

(2)

ABCDE is a pentagon. The pentagon has the line with equation $y = -x$ as its axis of symmetry.
The point *A* has coordinates (3, 0), the point *D* has coordinates (–4, 4) and the point *E* has coordinates (1, 3).

(b) Find the coordinates of *B* and the coordinates of *C*.

B (........................ , ...)

C (........................ , ...)

(2)

(Total for Question 19 is 4 marks)

Do NOT write in this space

20 y varies inversely as the cube of x

$y = 256$ when $x = \dfrac{1}{2}$

Find the value of x when $y = \dfrac{4}{27}$

$x =$ ....

(Total for Question 20 is 4 marks)

21 The nth term of a sequence is given by $u_n = 2^n$ where $n = 1, 2, 3, 4, \ldots$

(a) Write down the first four terms of this sequence.

....

(2)

(b) Find the value of $\dfrac{u_{500}}{u_{488}}$ giving your answer as a power of 8

....

(3)

(Total for Question 21 is 5 marks)

22 A particle P is moving along a straight line. At time t seconds ($t \geqslant 0$), the displacement, s metres, of P from a fixed point O of the line is given by

$$s = \frac{5}{3}t^3 - \frac{9}{2}t^2 - 2t$$

At time t seconds, the velocity of P is v m/s.

(a) Find an expression for v in terms of t.

$v =$ ....
(2)

(b) Find the value of t when P is instantaneously at rest.

$t =$ ....
(3)

(Total for Question 22 is 5 marks)

Turn over ▶

23
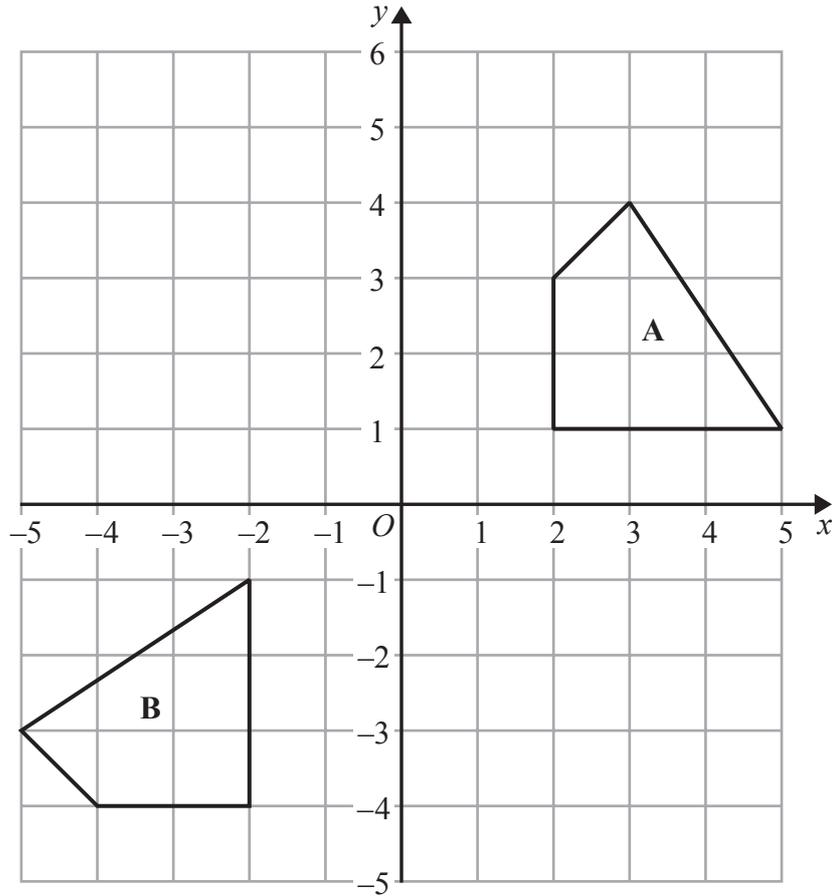

Quadrilateral **A** is transformed to quadrilateral **B** by an anticlockwise rotation about the origin followed by a translation.

(a) Write down the angle of rotation.

....

(1)

(b) Find the 2 × 2 matrix which represents this rotation.

$$\begin{pmatrix} & \\ & \end{pmatrix}$$

(2)

(c) Find the column vector which represents the translation.

$$\begin{pmatrix} \\ \\ \\ \end{pmatrix}$$

(2)

(Total for Question 23 is 5 marks)

Do NOT write in this space

24 Given that for all values of x,

$$6x^3 - 19x^2 - 26x + 24 = (6x^2 + kx - 6)(x - 4) \qquad \text{where } k \text{ is a constant,}$$

(a) show that $k = 5$

(2)

(b) Hence factorise completely $6x^3 - 19x^2 - 26x + 24$

(3)

**(Total for Question 24 is 5 marks)**

Do NOT write in this space

25

B

Diagram **NOT** accurately drawn

A

C

120°

14 cm

O

The diagram shows a piece of card in the shape of a sector, *OABC,* of a circle of radius 14 cm and centre *O.* The arc *ABC* subtends an angle of 120° at the centre of the circle.

(a) Calculate the length, in cm to 3 significant figures, of the arc *ABC*.

.... cm

(2)

A hollow right circular cone is formed by joining *OA* and *OC* together.

Calculate, in cm to 3 significant figures,

(b) the radius of the cone,

.... cm

(2)

(c) the height of the cone.

.... cm
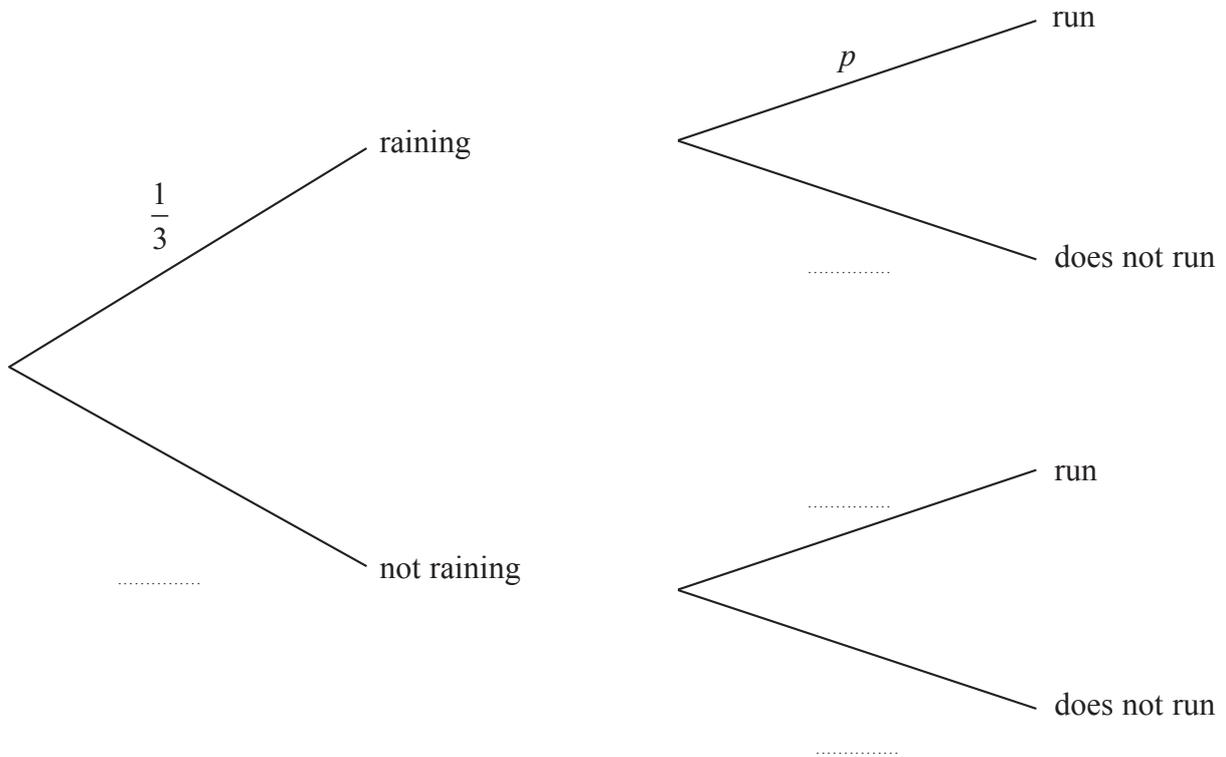

(2)

(Total for Question 25 is 6 marks)

26 The probability that it rains on any morning in the town of *Lloviendo* is $\frac{1}{3}$

If it is raining on a morning, the probability that Maria goes for a run is p

If it is not raining on a morning, the probability that Maria goes for a run is $\frac{4}{5}$

(a) Complete the probability tree diagram.

raining

$\frac{1}{3}$

p — run

.... — does not run

not raining

.... — run

.... — does not run

....

(3)

The probability that Maria goes for a run on any morning is $\dfrac{37}{60}$

(b) Using your tree diagram and this information, form an equation in p

....

(2)

(c) Find the value of p

$p = $ ....

(2)

(Total for Question 26 is 7 marks)

Do NOT write in this space
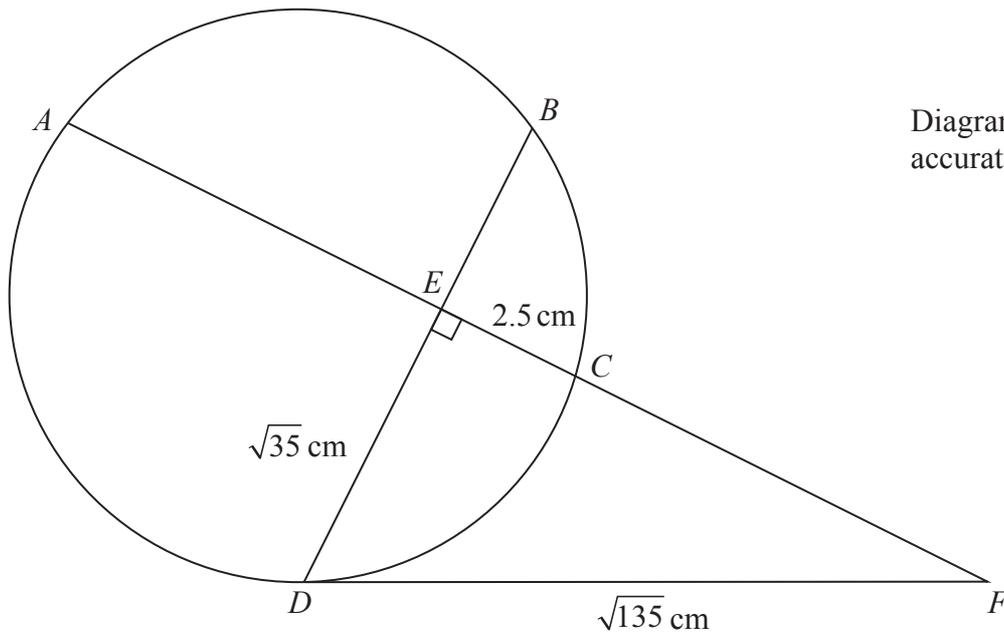

27

Diagram **NOT** accurately drawn

ABCD is a circle. The chords *AC* and *DB* intersect at right angles at the point *E*. The point *F* is such that *AECF* is a straight line and *FD* is the tangent to the circle at *D*.

EC = 2.5 cm, *DE* = $\sqrt{35}$ cm and *DF* = $\sqrt{135}$ cm.

(a) Calculate the length, in cm, of *EF*.

.... cm

(2)

(b) Show that *AE* = 8 cm.

(3)

(c) Calculate the length, in cm to 3 significant figures, of *EB*.

.... cm

(2)

(Total for Question 27 is 7 marks)

Do NOT write in this space

Turn over for Question 28
